

Thanks to many years of experience in film production, we recommend our highest quality ecological products made of recycled raw materials (PCR).

ecoAGRO

ecoAGRO silage film is used for wrapping hay bales or other after-crops plants to ensilage. It can be used for forage plants with hard and stiff stems, as it is characterized by very high stickiness and resistance to punctures and tears.

Dedicated to all types of wrappers available on the market.

Standard roll width: 500mm and 750mm

Thickness: 25 microns

Color: milky, green, black*

ecoWASTE

ecoWASTE film is dedicated for wrapping bales of waste of all origins. It has a multi-layer structure that provides high barrier properties and its bidirectional orientation allows the bale to maintain its proper shape. It works perfectly at low temperatures.

Standard roll width: 500mm and 750mm

Thickness: 25 microns

Color: milky, green, black*

ecoSTRETCH

ecoSTRETCH packaging film is designed for manual or machine wrapping of goods and pallets. Dedicated to all semi-automatic or plate wrappers.

Recommended stretch is 150%.

Standard roll width: 500mm

Thickness from 17 to 23 microns

Colour: transparent or black

Roll weight: from 2 kg to 16 kg*

* any other non-standard films on individual request

Additional UV protection for regions with increased radiation:

ecoAGRO High UV

ecoAGRO & ecoWASTE width 1280 mm

SPECIAL OFFER:

- RecyClass certified foils:
 - **ecoSTRETCH** transparent foil: 97% recycled content
 - **ecoSTRETCH** black foil: 95% recycled content
 - **ecoAGRO** and **ecoWASTE** films : 90% recycled content
- High UV films with additional protection for regions with increased UV radiation.
- **ecoAGRO** and **ecoWASTE** films with a width of 1280 mm

We recommend our LDPE films, including SHEETS, SLEEVES and SEMI-SLEEVES.

LDPE Films

Using LDPE sheets, sleeves or semi-sleeves is a simple and cheap way to protect products or pallets. Our films are functional and at the same time environmentally friendly, because they are made entirely of recycled raw materials. You will find durable, universal and aesthetic protective films in our store: www.sklep.folgos.pl

	SLEEVE	SLEEVE WITH PLEATS	SEMI-SLEEVE	SHEET
				
Width	from 100 mm to 1500 mm (from 10cm to 150 cm) Diameter: from 6,37 cm to 95 cm*		from 100 mm to 3000 mm (from 10 cm to 150 cm – before unfolding and up to 300 cm after unfolding)	from 100 mm to 1500 mm (from 10 cm to 150 cm)
Thickness	from 20 to 200 micron			
Core	possibility of winding on cores with a diameter: Ø76 and Ø50			
Gross roll weight	max 50 kg			
Application	spacers for goods/pallets, bags			
Colour	straw (shade of film may vary), black			

*example how to calculate the sleeve diameter: $10\text{cm} \times 2 = 20\text{cm}$ (circumference), $20\text{cm}/3.14$ (pi number) = 6.37
